

APARTMENTS & GATED COMMUNITIES

KURO Gate Security

Modern Gate Access Control, Lead Capture & Guard Management Built for Property Managers and Landlords

 An Orange Sands Technology Solution

The Hidden Risks of Paper Logs

Privacy & ODPC Violations

Physical gate books expose residents' and visitors' names, phone numbers, and vehicle plates to anyone flipping through the pages—creating major compliance risks under Kenya's Data Protection Act (ODPC).

Zero Guard Accountability

Manual paper logs suffer from illegible handwriting, missing entry times, and zero verification. Security companies cannot accurately track guard shift handovers or prevent unauthorized access.

Smart Gate Automation

Transform your gatehouse into a high-security, privacy-first, and lead-generating operations center.

Gate Visitor Management

Streamlined Gate Access

KURO replaces physical registers with an intuitive Android gate app. Guards instantly check in visitors, delivery drivers, contractors, and maintenance personnel in seconds.

Residents receive immediate notification when guests arrive, eliminating bottlenecks and providing property management with a complete, searchable digital record of all activity.

Turn Gates into Lead Engines

100%

LEAD CAPTURE

Capture Prospective Tenant & Buyer Leads

Gatehouse guards are the first people prospective tenants or buyers talk to when looking for vacant apartments in your complex.

With KURO, guards instantly record walk-in prospect details (name, contact, interested unit size, etc.) right at the gate. Landlords and property agents receive instant alerts to follow up and fill vacancies faster.

Blacklisting & Shift Control

Instant Blacklist Alerts

Maintain property safety by instantly blacklisting unwanted visitors, banned service providers, or defaulting former tenants. The gate app triggers an immediate audio/visual alert if a blacklisted individual or vehicle attempts entry.

Guard Shift Tracking

Keep precise records of guard shift changes, clock-in/clock-out times, and guard roster handovers at the gate. Landlords can ensure security companies are delivering agreed staffing levels 24/7.

Paper Logbooks vs. KURO

Capability	Traditional Paper Logbook		KURO Gate Platform	
Data Privacy (ODPC)	Non-Compliant	Non-Compliant Public exposure	100% Secure	100% Secure Encrypted digital logs
Vacancy Lead Capture	No	No Leads lost or forgotten	Yes	Yes Automatic agent alerts
Blacklist Enforcement	Manual	Manual Relies on guard memory	Automated	Automated Instant audio/visual alert
Guard Shift Tracking	Unreliable	Unreliable Easily falsified	Real-time	Real-time Digital shift logs & handovers
Activity Reporting	Hours	Hours Manual page search	Instant	Instant 1-Click PDF/Excel download
Software Subscription		KES 0	100% FREE	100% FREE Zero monthly fee

Transparent Pricing & Setup

KES 0 / mo **Free Software**

100% free platform access. No recurring monthly software licenses, no hidden user fees, and no per-visitor charges.

KES 15,000 **Assisted Setup**

Optional complete setup by Orange Sands. Includes backend configuration, gate guard training, and admin portal orientation.

KES 0 **Self-Onboarding**

Onboard your property independently at zero cost using our comprehensive setup guides and manuals.

Hardware & Connectivity

Bring Your Own Device (BYOD) Use any standard Android tablet or smartphone at your gatehouse. You own the hardware outright—no mandatory device lease or rentals.

Flexible Data Management Landlords and property managers manage their own local SIM cards and monthly internet bundle (approx. 3GB–5GB/month).

Offline-First Technology KURO continues to log visitors and check in guests even if Wi-Fi or cellular networks drop, syncing automatically when reconnected.

Rugged Accessories Support We recommend specifications for heavy-duty shockproof cases and permanent power chargers for gatehouses.

Upgrade Your Property Today

Zero monthly subscription fees. Modern security, privacy compliance, and lead capture for your apartment complex or gated community.
